Lawn Construction and Earthworks

Profitable owner operator business

Modern Kanga Loader with all the attachments

Lawn construction, trenching and post hole drilling services

Clients are leading builders, construction and developers

Lots of work in the pipeline

A simple business to run and operate

This highly respected business has been constructing lawns and providing earthwork services for new building sites all over Hawke's Bay for over 16 years.

Highly respected by a large client base of builders, house construction companies and developers the business provides earthwork services for new builds, predominantly lawn construction but also trenching, post hole drilling and sand bases. There is a pipeline of work into the future and constant demand for specialised earthwork services around existing and new building sites.

The business includes a near new Kanga Loader with a large range of attachments and sizes of hole drilling, trenches, rotary hoeing, sweeping and loader work. It also includes an innovative Lawn Seed attachment designed and built by the current owner to fit the Kanga.

The current owner is looking to retire and is happy to provide the necessary support to ensure a successful handover.

This is an attractive opportunity for someone who enjoys construction and landscaping. The business produces a reliable income stream due to long standing customer relationships and is in a prime position to be grown should the new owner choose to expand the business.
