Unique, Automotive Product - Ideal for area Franchising. Product adsorbs water from any fossil fuel, ideal for diesel, petrol (including Avgas), hydraulic & lubrication oils... A big market.

Fuel Dri is a unique product which adsorbs water from any fossil fuel, ideal for diesel, petrol (including Avgas), hydraulic & lubrication oils along with fuel storage facilities.

Completely negates 'Diesel Bug'

This very simple product is attached to the tank cap by a non-conductive s/s wire & simply rests in the bottom of the tank adsorbing any water, keeping your fuel or oil free of any water, negating the presence of diesel bug etc.

Fuel Dri is easily retrieved for inspection & replacement by anyone during refueling.

Applications include commercial, agricultural, civil & marine diesel equipment, hire equipment, jet boats, race cars & aviation fuel storage facilities. This product may also be used in hydraulic & lubricating oils where hot oil is returned back into cold reservoirs causing condensation.

Franchise by area for optimum market penetration along with website support for people with some mechanical aptitude & good sales/relationship skills.

This is a repeat business' opportunity with excellent returns & an ingoing cost of product only as previous usage was limited to owner operator.

Cost of ready to sell product, \$60,000 including large qty of raw materials.
