

Air Filter Online Retail Business for Sale NZ Anywhere

Excellent (currently) part time business that is completely flexible as to hours worked. Great website, and would respond well to some marketing.

Last year the business turned over 30k with a net profit of \$6.6k.

This is currently a part time business with the benefit of being completely flexible as to hours worked, and wherever you are in the country.

The only things to consider is you need to process orders at least every second day during the week and you need access to a courier depot.

No marketing has been done in the last year and so the turnover is only organic growth and returning customers. This presents a great opportunity to someone who would like to grow this business.

The website has 1.6k registered users. The ideal buyer would have the time to invest in learning how to use SEO and digital marketing to build the business.

Would respond well to using Google Adwords and marketing.

Location: **New Zealand**
