Plant nursery, garden centre and landscaping business plus real estate

- Plant nursery, garden centre and landscaping business plus real estate
- The award-winning business The Greenery is to be sold as a freehold going concern
- Land area: 10.46 hectares (more or less) covering two adjoining titles

The Greenery plant nursery and garden centre is located on State Highway 1, five minutes north of Otaki, on the Kapiti Coast. This rapidly growing business produces multiple income streams from plant cultivation, a retail garden centre and a landscaping construction division. The Greenery supports the community via The Collective where local creatives and artist can display and sell their products on consignment. Clever marketing including running Night Markets with food trucks enhances The Greenery as a destination for customers looking for plants, coffee + food and unique giftware.

The nursery grows exotics, ferns, specimen trees, succulents and also specialises in the cultivation of eco-sourced native plants from seed. These eco-sourced natives are sold via the landscaping division, to the public, and to local councils through preferred supplier agreements. The business is poised for major revenue growth as demand continues to increase.

This freehold going concern covers over 10 hectares of land. The garden centre and nursery currently utilises around 20% of the site so there is scope for further expansion of the nursery. Alternatively, the rear of the property is elevated so potentially a house site with 360-degree vistas. This is a well laid out, beautiful property, incorporating a profitable business that is ready to be taken to the next level.
