Business Resources

The Buyer & Seller

Buyer skills should include people & sales management, and the focus of a new owner will be oversight of the business and the management team; business development and perhaps logistics/stock ordering from overseas. There are some technical aspects to product management and the existing owner is quite prepared to provide an excellent handover and/or consult if required - and there is very strong technical support inhouse. The vendor had no industry experience when they purchased the business and they have excelled in it.

Having substantially improved the top and bottom lines since they purchased this business (via Tabak), the vendor is simply looking for a new challenge, and there is still good opportunity to grow this business further.
