

Uptake Fertiliser Business for Sale Whakatu, Hastings

For Sale - Uptake - Better Land Better Stock

For sale is the rural fertiliser business, Uptake Limited - Better Land Better Stock.

Passionate about the rural sector but not into farming? Uptake has a proud history for over 40 years of providing farmers with on-site consultations to assess and analyse soil, pasture and animal's needs for optimum performance. Bringing science back to the land.

The day-to-day running of this business involves on-farm consultations with the clients, detailed analysis of the soil tests taken, then back to the workshop and blend the customised fertiliser for their farms needs and organising delivery and application. There is ongoing support and follow up provided to ensure the client is a repeat client. With a proven track record of success in the North Island, we can show the profitability of the business and the net operating surplus of over the past three financial years.

Uptake is a well-positioned business in the rural sector backed by 40 years of blood sweet and tears from the founding owners. The business is well set up in the existing building and there is long-term lease option available for the new owners.
