Hawke's Bay Plant Nursery Business For Sale

Located in Hawke's Bay this plant nursery incorporates two different business operations under the one roof. These are;

- Growing of vegetable seedlings from seed on behalf of contracted market gardeners
- Retail store sales where an extensive variety of plants are cultivated on site and sold to the public.

This long-established plant nursery has a reputation for growing healthy, high-quality plants. The range of plants is considerable, covering a vast variety of vegetables, perennials and flowers. All the plants are cultivated from seed within the hundreds of square metres of greenhouses on site.

The business comes with high-speed machinery for planting seeds. Clients include florists and supply agreements with local council. There is an opportunity to significantly increase this side of the business.

The hard graft to successfully establish the business as a producer of healthy, high quality plants has been done. The opportunity is available to further grow the business as all the infrastructure is in place. Due to health reasons, the current owners are looking to sell to an energetic new owner who sees the opportunity to take the business to the next level.
