Location: **Waikato**  
Asking: **\$4,500**  
**Negotiable; +SAV**  
Turnover: **\$11,012**  
Type: **Home Based**

### Woodworking Opportunity - timber capping for electrical cabling, preparation and sales, good growth potential, owner retiring.

This home-based business is an ideal extra income earner for a practical person who enjoys working with timber. It involves variable part time hours each week for a sole-charge owner/operator.

Wooden cable capping (untreated pine) is procured from a timber machining company, cut to length, sanded, and packed into order bundles for courier delivery to electrical wholesalers, from Kaitia to Taupo.

Competition is virtually non-existent for this timber product (alternatives are plastic) and there is great potential for sales growth by marketing to designers, electricians, and electrical wholesalers.

The business has been established more than 25 years and has provided a useful income boost to the current owner, who is now retiring.

#### Business Resources

Resources include roughly six months' supply of wooden capping for preparation to order, courier tickets, and packaging materials. Storage racking is provided, and a mitre or drop saw and work bench are the only equipment required.

Timber handling techniques, packaging, processing of orders, and invoicing are the skills required to operate this business from your own small premises.

Current owner willing to provide up to two hours training in techniques and transitioning.

Asking price is +SAV
